

November 3, 2022

At Sheikh ghat Govt primary school in Sylhet, JICA and Department of Food Safety held a teacher training session to spread knowledge about food safety among elementary school students. 24 selected faculty members participated and various training materials were distributed. The workshop ended with a certificate of completion awarded to the participants. Participating teachers said the workshop would play an important role in changing community behavior on food safety and expected good results if the training materials were delivered to all schools in Bangladesh. This workshop will continue in 108 primary schools until February 2023.

The NPO's picture books are provided to JICA and used as training materials in the form of panels. Also, some of the pictures in the picture book have been edited into illustrations that match local life.
